BACKGROUND INFORMATION: On November 27, 2001, the Board of Supervisors approved the release of a Request for Qualification (RFQ) for Information Technology (IT) Services. The purpose and goal of this RFQ was to pre-qualify Information Technology firms that could be used by County departments to contract with to meet their IT service needs.

County departments, including Information Services Department (ISD), continue to have a need to contract for qualified professionals to provide programming, database design, project management, and professional and technical services in order to meet information technology workload requirements. Personnel selected from the pre-qualified list of information technology firms will provide IT services to supplement work efforts of current County IT staff. By having a pre-qualified list of IT firms that are qualified in eleven (11) services categories for County departments to select from will streamline the process of acquiring IT professional services.

The RFQ process for IT services was successful and ninety-two (92) Qualifications Applications were received. ISD has completed a thorough review of all qualifications applications that were received by the deadline date of the RFQ. Based on the applicants reply to the terms set forth in the RFQ's Qualification Application, ISD has prepared a list of vendors who qualify to provide IT Services to County Departments. ISD requests approval of this list. The pre-qualified vendor list will be effective from April 2002 through March 2005. Departments will use this list of vendors when there is a need to contract for IT services. If a department feels none of the vendors on the list can provide services they need, the County department would need to come to the Board with a separate RFQ or RFP process depending upon their specific service requirement and proposed cost. Use of the pre-qualified vendor list will eliminate the need for a formal RFP each time contract services is needed, however county departments would be required to obtain Board approval when the cost of IT services with a vendor exceeds \$25,000 during the fiscal year.

REVIEW BY OTHERS: This item has been reviewed by the County Administrative Office (Tracy Lindsay, Administrative Analyst) on February 13, 2002, Purchasing (Aurelio De La Torre, Director) on February 13, 2002 and reviewed for legal form and content by County Counsel (Jean-Rene Basle, Deputy County Counsel) on February 13, 2002.

FINANCIAL IMPACT: Expenditures from departments using these services will be approved within each department budget. ISD's usage is estimated at approximately \$3 million annually and this cost has been included in ISD's Computer Operations Internal Service Fund (IAJ-FIS) adopted FY2001-02 budget.

SUPERVISORIAL DISTRICT(S): All
